PERSONAL PROFILE

I have recently completed a Diploma in IT and have been working as a Web Developer for a sustainable building company. I have a passion for web development, and am eager to join a company that would help expand my skills and provide the opportunity to work on diverse projects. I am a quick learner and enjoy a challenge, and want to combine my skills from both my IT Diploma and Bachelor of Mechanical Engineering to help find solutions to problems.

SKILLS AND ABILITIES

- Website development using HTML/CSS & JavaScript.
- NodeJS and Express
- RESTFul API
- OOP programming principles (Java, Python)
- Database management using MongoDB and SQL.
- High skill in Problem solving
- Team minded
- Attention to details and great time management
- First and second Level Remote Help-Desk Support
- Can work unsupervised
- Practical design abilities
